

# I NY BEGINNER'S BIRDING CHALLENGE

Find these 10 common New York birds

Department of Environmental Conservation

Birding is an activity enjoyed by many New Yorkers of all ages and abilities and is a great way to connect with the outdoor world. Like people, different birds like to live in different places or habitats. The following common birds are typical of habitats in New York State. Use your observation skills and see if you can find these birds in their preferred habitats near your own home. Successfully complete your challenge and you will be entered into a drawing for fun birding accessories. Open to NYS residents 16 years old and younger.

**Black-capped Chickadee**

Named after its distinctive *chick-a-dee-dee-dee* call, the chickadee is one of the friendliest birds around. They are very curious and will often fly right up to a person to investigate them and can sometimes be fed by hand. The chickadee has a black cap and throat with white cheeks.

Length: 4 to 6 inches.

**Mourning Dove**

Similar to the chickadee, the mourning dove is named after its primary call - a gloomy cooing sound. Mourning doves are commonly seen picking up seeds and grit on the ground. When disturbed they take off like a rocket. Mourning doves are brown to pinkish tan in color with black spots on the wings and black tips on their pointed tail feathers.

Length: 11 to 12 inches.
